

Let us look after your security!

Monitoring and active support from Highway with the award-winning internet security solution that detects, blocks, and removes viruses and malware

Maybe you already use AVG Free or a paid-for version... or maybe another type of anti-virus... but the **CloudCare Solution** is better by far. It increases your peace of mind over the security of your computer simply by allowing **Highway** to monitor it on your behalf.

If your **CloudCare** version is out of date, we will be on your case and can usually upgrade you remotely without even bothering you! If malware or viruses are identified, **Highway** is notified and can help deal with them.

There is no minimum period to sign up to, just pay as you go monthly at £3.00 a month (added to your membership) for trusted, secure monitoring and support.

No longer will you be plagued with updates and new versions questions; we check and handle all of this for you.

Other benefits of **CloudCare**:

- ✓ Ensures that your protection is *always* up-to-date with real-time updates and upgrades
- ✓ CloudCare works with any web browser to check files *before* they're downloaded
- ✓ Scans website addresses to protect you while searching, shopping, and banking online
- ✓ CloudCare actively checks web links before clicking to prevent you from visiting malicious websites
- ✓ Provides automatic, real-time scans of any links exchanged on Facebook, Twitter or Skype
- ✓ The CloudCare *firewall* works on both wired and wireless networks to protect your data
- ✓ The *Smart Scanning* runs only when you are not using your computer
- ✓ If you shop online, you'll be warned when any potentially dangerous software tries to steal your data

You can download and install **CloudCare** yourself or request a Remote Support session at the members' reduced rate of £18.00

Call or e-mail us now for peace of mind with your computer security!
